“ *If this is not the same Betty J. Raper as I described in my earlier comment, I sincerely apologize for my mistake.*

“ *Even though I never met Betty in person, we are both descendants of Albert Gholson, one of the very early Texans, and she was very generous in sharing her family history and photos with me, which will be included in the history I am currently compiling. I am very grateful for the information that I had not found elsewhere, and I wish I could have known her.*
